Personal Data:

Date of Birth: 14th November 1994
Place of Birth: Rheinfelden (Baden), Germany
Nationalities: German, Swiss

Research Interests:

I am generally interested in the interaction of inequality and macroeconomic dynamics. My current projects are concerned with fluctuations in the economy's liquidity. Such fluctuations affect households' insurance against idiosyncratic risk, and, through the portfolio problem of the household, affect product variety in the long-run or aggregate demand in the short run.
